DETAILED ACTION

Receipt of applicants' amendments and remarks submitted April 29, 2002 is acknowledged.

Applicants' amendments, which cancel all the previous claims and add new claims 13-25, make the following species election requirement necessary.

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

2-methyl-5-methylsulfonyl-4-(1-pyrrolyl)benzoylguanidine methanesulfonate;

N-[2-methyl-4,5-bis-(methylsulfonyl)benzoyl]guanidine hydrochloride;

4-isopropyl-3-methylsulfonylbenzoylguanidine methanesulfonate.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1617

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claim 15: 2-methyl-5-methylsulfonyl-4-(1-pyrrolyl)benzoylguanidine methanesulfonate;

Claim 16: N-[2-methyl-4,5-bis-(methylsulfonyl)benzoyl]guanidine hydrochloride;

And claim 17: 4-isopropyl-3-methylsulfonylbenzoylguanidine methanesulfonate.

The following claim(s) are generic: 13, 14, 18-25.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the different chemical structures of the compounds lead to quite different physical properties of the compounds, such as melting point, vapor pressure, crystallization, solubility etc. They therefore lack the same or corresponding special technical feature regarding to the lyophilization process claimed herein.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shengjun Wang, Ph.D. whose telephone number is (703) 308-4554. The examiner can normally be reached on Monday-Friday from 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minna Moezie, J.D., can be reached on (703) 308-4612. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.
